FABRITECTURE
WHERE DREAMS TAKE SHAPE

ADELAIDE OVAL REDEVELOPMENT - PROGRESS

Fabritecture has now fully established itself on site in Adelaide, having mobilised, in preparation for the installation of the Southern and Eastern Stands, as part of the redevelopment project.

To complete this project, Fabritecture will use more than 20,000sqm of PTFE Fabric (Teflon Coated Fibreglass) and by the end of July 2013, Justin Dale – Fabritecture's Senior Project Manager, will have a team of more than 20 experienced and dedicated installation experts on site in Adelaide.

The custom designed fabric and steelwork, for this project has been delivered to site and currently, the Level 5 Canopies, on the Southern Stand are being installed. The Southern Stand PTFE installation will commence in August, with the project being completed as scheduled in November 2013.

Fabritecture is proud to be the preferred supplier of the fabric, design and construction for the Adelaide Oval Redevelopment.

COCKBURN TOWN CENTRE 2013 AWARD FOR EXCELLENCE

Fabritecture has received a Special Commendation for the Cockburn Town Centre Project in Western Australia at the Annual Specialised Textiles Association Awards 2013.

"Cockburn is a bustling town centre that now has an iconic fabric structure landmark. The professionalism, project management expertise and the commitment of the Fabritecture Team was exceptional and this was a major component of the success of the Cockburn Town Centre Project"

Matt Huxtable, Managing Director – Phase 3 Landscapes

FABRITECTURE DELIVERS THE FIRST OF 16 GOLDLINQ STATIONS

Gold Coast Light Rail

Fabritecture has commenced installation of the Goldlinq Light Rail Stations on the Gold Coast, Australia. In total 16 custom designed stations will be completed by December 2013.

Fabritecture will engineer, fabricate and install custom designed fabric canopies, to all stations on the Goldlinq line. Fabritecture is proud to be the preferred fabric canopy supplier for this new and exciting transport system.

REMEDiation ENCLOSURE SOLUTIONS

Not every site is the same, especially when it comes to remediation. That's why we offer a wide array of options to customize our already rugged structures.

ALL ALLSITE STRUCTURE CAN PROVIDE:

-  CLIMATE CONTROL AND VENTILATION
-  HOLD NEGATIVE AIR PRESSURE
-  FRAMED OPENINGS FOR AIR FILTRATION
-  ELECTRICAL AND LIGHTING PACKAGES
-  NATURAL LIGHT OPTIONS: SKYLIGHTS, TRANSLUCENT PANELS
-  MAN DOORS, STEEL ROLL-UP DOORS, WHEELED BARN DOORS
-  FRAMED OPENINGS, ANY SIZE OR LOCATION
-  CUSTOM OPENINGS & MECHANICAL SYSTEMS INTEGRATION

Tough terrain? Loose soil? Our custom anchoring and ballast systems are ideal for difficult footing conditions, quick relocation, and worry-free stability.

Our TFS series provides column-free containment. Each structure is framed with heavy-duty aluminium and skinned with premium, remediation-grade fabric.

-  WITHSTANDS HIGH WINDS
-  EXTREME TEMPERATURES
-  SHEDS SNOW
-  WEATHER-TIGHT
-  CRANE LIFTABLE, MOVABLE DESIGN

“Assign a project manager to every project; bring the most experienced, most knowledgeable people to every task; always work with the most proven, tested and trusted materials; be across every detail at every moment; meet every deadline, every budget and every expectation.”

AVIATION HANGARS

WE SPECIALISE IN THE DESIGN, MANUFACTURE AND CONSTRUCTION OF FABRIC STRUCTURES FOR AVIATION APPLICATIONS.

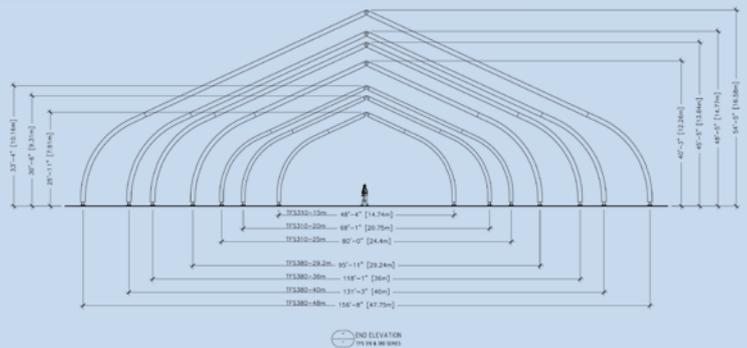

Global Fabric Structures have a diverse range of aviation clients, including commercial airlines, private operators and government and military departments.

The Global range of hangars can be rapidly installed and relocated, offering lower installation costs and feature simple footing designs and lightweight fabrics which saves on material costs.

The use of translucent tensile fabrics allows natural diffused daylighting, reducing operating costs. The Global range of fabric structures provides clear span coverage from 16m/52ft up to 100m/328ft.

CONSTRUCTED MODULARLY ON 3M/10FT TO 6M/19FT WIDE BAYS FOR:

- COMPLETELY RELOCATABLE
- RAPID INSTALLATION
- ENGINEERED STRUCTURAL FRAME
- LONG LASTING FIRE RATED FABRICS
- INTERNAL ENVIRONMENTAL CONTROL
- LIGHTING AND ACCESSORY OPTIONS
- STRUCTURAL LONGEVITY

AWARD WINNING DESIGNER AND INNOVATOR OF CUSTOM DESIGNED FABRIC ARCHITECTURE

"Our diverse experience and flexibility, in meeting our clients needs, is clearly what defines us. Our commitment, adaptability and our project management expertise, results in high profile clients entrusting Fabritecture to provide practical and spectacular solutions. Our experienced team turns your vision into a successful reality".
